

Message on the Observance of Id al-Fitr February 7, 1997

On behalf of all Americans, I want to extend greetings to all Muslims in the United States and around the world as you celebrate Id al-Fitr.

This celebration, which marks the end of a month of fasting and sacrifice, is an occasion for rejoicing. It is an opportunity for Muslims to gather in joy, as well as in remembrance of those less fortunate.

It is also an opportunity for all of us to rededicate ourselves, not only to achieving spiritual growth, but also to the cause of peace

between all peoples of the earth. It is our common challenge and our shared responsibility to create a better world for ourselves and our children.

To all who practice the faith of Islam, in the United States and abroad, Hillary and I extend our very best wishes. May peace be with you and your families, and may God grant you health and prosperity now and in the year ahead.

BILL CLINTON

The President's Radio Address February 8, 1997

The President. Good morning. This morning the Vice President and I are going to talk about the progress we've made to bring 21st century technology to our students and our schools.

In my State of the Union Address Tuesday night, I issued a call to action to all Americans to prepare our people for the 21st century. The very heart of this mission and my number one priority these next 4 years is to give our children the best education in the world.

Education is about opportunity, about giving our children the tools to make the most of their God-given potential. This is a goal every American must share for every other American. That's why I'm calling for a new, nonpartisan commitment to education. During the cold war, America had a bipartisan commitment to foreign policy and politics stopped at the water's edge. Today, education is a critical national security issue for our future, and our politics must stop at the schoolhouse door.

My plan calls for world-class standards for students, teachers, and schools. It calls for expanding Head Start, rebuilding crumbling schools, opening the doors of college wider than ever before, and ensuring that workers can learn and earn for a lifetime.

To give our children the best education, we must help them to harness the powerful forces of technology. That's why we've challenged

America to connect every classroom and library to the Internet by the year 2000. For the first time in history, children in the most isolated rural towns, the most comfortable suburbs, and the poorest inner-city schools will have the same access to the same universe of knowledge.

We've come a long way toward meeting that goal, and we owe much of that progress to the leadership of the Vice President who will now say a few words about our efforts.

[At this point, the Vice President made brief remarks.]

The President. Thank you, Mr. Vice President. We are making a lot of progress. Today we're issuing a report prepared by Secretary Riley and the Department of Education that shows that 65 percent of our schools are now connected to the Internet, almost double the number of schools connected in 1994. But it's not enough to connect every school; we must connect every classroom and every library as well. Since 1994, we have more than quadrupled the number of classrooms with a direct link to the Internet, but the vast majority still do not have access. That's why we're now launching an aggressive, three-part plan to finish the job.
